

## **Funding Proposals and Applications**

The Board has as its primary mission the education of District students according to adopted goals and objectives. To this end all legal and worthwhile financial resources, especially those that will alleviate the local tax burden, will be pursued.

We will pursue those grants available from either the Federal or State Government that will help the District meet adopted goals and objectives of the curriculum or create facilities or purchase equipment that will help meet District goals and objectives.

Every presentation to the Board regarding pursuit of outside funding must include what obligations, or encumbrances will exist when the grant ceases.

The Board will consider such requests for grants that meet the criteria above and have the support of the Superintendent. The Board reaffirms its veto power over all grants prior to acceptance of funds.

END OF POLICY
